Your Valuable Comments on:

1 – Courses to be added / modified to make students up to date and as per the need of the Industries:

Courses on IT & Cyber Security domain should be added. As post pandemic, lots of companies have introduced digitization in their regular mode of operation.

2 – Steps to be taken to acquire better results in competitive examinations:

Instead of theoretical & rote learning based assignments, students should be given more analytical & brainstorming type & project based on real life scenarios.

3 – Upcoming challenges in your discipline based on global scenario:

Post pandemic, due to mass digitization efforts implemented in the form, an employee would have to struggle in both marketing and operation domains, without adequate knowledge on firm's IT infrastructure.

4 – Recruiting sectors which can be invited to BGU for campus placement:

Cyber security, pharmaceuticals & E-commerce sectors should be invited to BGU for campus placement, considering the post-pandemic scenario.

5 – Any other points you would like to share:

Students should be encouraged to independently do their research & networking for the sake of their placements & further career advancements, instead of completely being dependent on the University faculties.
